

# Sleek and elegant suspension lamp.

Akemi is a sleek and elegant suspension lamp which features two main hand blown glass components. The milky white body is made out of layers of glass, resulting in a glossy finish - we call this "lattimo". The transparent upper section recalls a traditional Venetian decorative glass technique called "ballotton", which donates some more texture and refinement to the lamp all together. Akemi features CRI 90 LED technology, and lights up in both upward and downward directions, ensuring an evenly spread ambient lighting. Diameter 50cm, Height 42cm.
