

7055

Design by de Majo Heritage

Unique glass working techniques.

7055 is a classical looking chandelier with coloured accents and stunning handcrafted details. Featuring uncommon and rather unique glass working techniques, some of the details on this piece are a really fascinating insight on the attention to detail which is put into artisanal glassmaking. Includes 24K gold leaf applications and is highly customisable. Configurations also include a wall lamp version and a table lamp version. Dimensions vary.
