Lo spunto progettuale di Enrico Franzolini e Vicente García Jiménez è l'espressione estetica della luce che si rifrange sulle pareti in titanio usate nei rivestimenti murali di molte aree museali (tra le quali il Museo Guggenheim di Bilbao). Le sospensioni Glow si possono articolare in moduli orizzontali dotate di una barra in acciaio cromato lucido e possono essere composte da 1 a 2 corpi illuminanti.

eng

The design inspiration of Enrico Franzolini and Vicente Garcia Jimenez is the aesthetic expression of the light refracting on the titanium walls used in the wall coverings of many museums (including the Guggenheim Museum in Bilbao). Glow pendant lamps can be arranged in horizontal modules equipped with a polished chrome steel bar and they can consist of 1 to 2 luminaires.
