Artemide®

NH1217

Neri&Hu

nh1217 continues the study on the dynamic interaction of expertise, details, materials, form and light that **Neri&Hu** are developing with Artemide.

A white blown glass sphere slides along a brushed brass ring, which allows it to take different positions and to freely adjust and direct the diffuser. The frame becomes a support, a hook to hang the appliance to the wall, or a handle promoting an interaction with light.

The selected materials represent a perfect combination of tradition and innovation, as well as the expression of responsible and sustainable design, also conveyed by the use of a **low consumption retrofit LED source**.

Like all the projects designed by **Neri&Hu**, **nh1217** offers a reinterpretation of the Oriental culture and tradition with a constant contemporary approach.

nh1217 is operated intuitively as a reference to the use of lanterns, and allows freedom in creating countless lightscapes. It is an essential, versatile element, suited to illuminate a variety of contexts in a simple and poetic manner.

The basic element of **nh1217** evolves with structures that support it and combine to bring light into space. The most basic version features a clamp for wall fixing. In the four suspended versions, a light metal rod is hung horizontally and supports the brass ring that holds the sphere in **two different sizes (14 cm, 22cm)**.

The base element of **nh1217** thus moves freely in space, the luminous sphere is free to slide and take light to different positions.

This structure is then repeated on three levels in a cluster element that also introduces the possibility to change the angles generated between the rods: one of

the suspension cables is shared by the three rods, whereas the other can be set freely in space to define the overall geometry.

With surprising lightness and elementary movements **nh1217** creates a landscape of elements generating – either individually or combined with each other – a non-static balanced composition characterized by elegant colour and material matching.
