

# NIGHT BIRDS

Inspired by the abandon and freedom of bird flight, the innovative Night Birds suspension lights impart poetic enchantment and unparalleled dynamism to any interior. Night Birds differ from the other collections in the unique technology applied in production, which involves melting glass into a mould and then bending it. The process makes it possible to instil delicate nuances in the shape of the wings and achieve a colouration of the glass that is different and holly unique each time. The collection's

restraint and directness are underscored by the minimalist LED light source set in a fixture of lacquered and polished aluminium. The Night Birds collection comprises three lights with different wing attitudes depicting the various phases of bird flight. The lights come in white or dark glass as well as in BROKISGLASS, and there is also a new outdoor variant. Night Birds work best in large flocks. Now the metal components are also available in a black anodized finish.

# NIGHT BIRDS EXTERIOR

The Night Birds collection by Boris Klimek is now available in a version suitable for exterior use. Night Birds Exterior are identical to the original indoor collection, which was inspired by the freedom and abandon of bird flight. In order to withstand the whims of the weather, the lights have been modified to comply with the IP54 rating for exterior use, namely by enlarging and weatherproofing the positionable hand-polished dural fixture, which conceals

a sophisticated balancing mechanism and the subtle LED light source. The bigger, more robust metal fixture also allows for a greater selection of light sources. Like the original Night Birds collection, Night Birds Exterior offers three different lights, each with a different wing position, which come in either white or dark (nearly black) variants. From now on, Night Birds are as at home in the elements or the dark of night as they are in the comfort of the indoors.
