

Dots

Design by Martín Azúa.

A diminutive wall sconce delivers outsized impact in the form of simple, circular dots. Seamlessly connecting a space with an intimate landscape of beams and halos, the collection creates a melody of light like a composition of musical notes in concert with another.

Its compact shape, range of colour finishes, and warm wood material make Dots very easy to integrate into a space.

4662 item with on-off switch on the back plate.

“Dots is a **simple, versatile lighting system** that offers many different solutions in one collection. If we forget the idea that wall lamps are boring, we can suddenly start playing with material, colours and lighting effects in group or individually to create comfortable atmospheres”.

Martín Azúa.

Compact, glowing circles trace individual points of light across the wall with the Dots collection. Small in scale with a bold simplicity, the lamps offer personalised functionality in several versions: a graphic, directional light; an ambient, indirect light; and an accent/reading light.

Deployed alone like a sparkling jewel or in combination to create a glowing galaxy, the collection offers an intimate universe of light. The luminaires exude a fresh and playful feel, connecting a space while providing myriad lighting solutions. Dots is available in solid wood or lacquered in four of Vibia's Chromatica® colours.

Ref. 4665.

- 13 Grey L1 (NCS S 1000-N)
- 27 Brown L1 (NCS S 1505-Y50R)
- 37 Terra Red (NCS S 4040-Y70R)
