

# Kontur

Design by Sebastian Herkner.

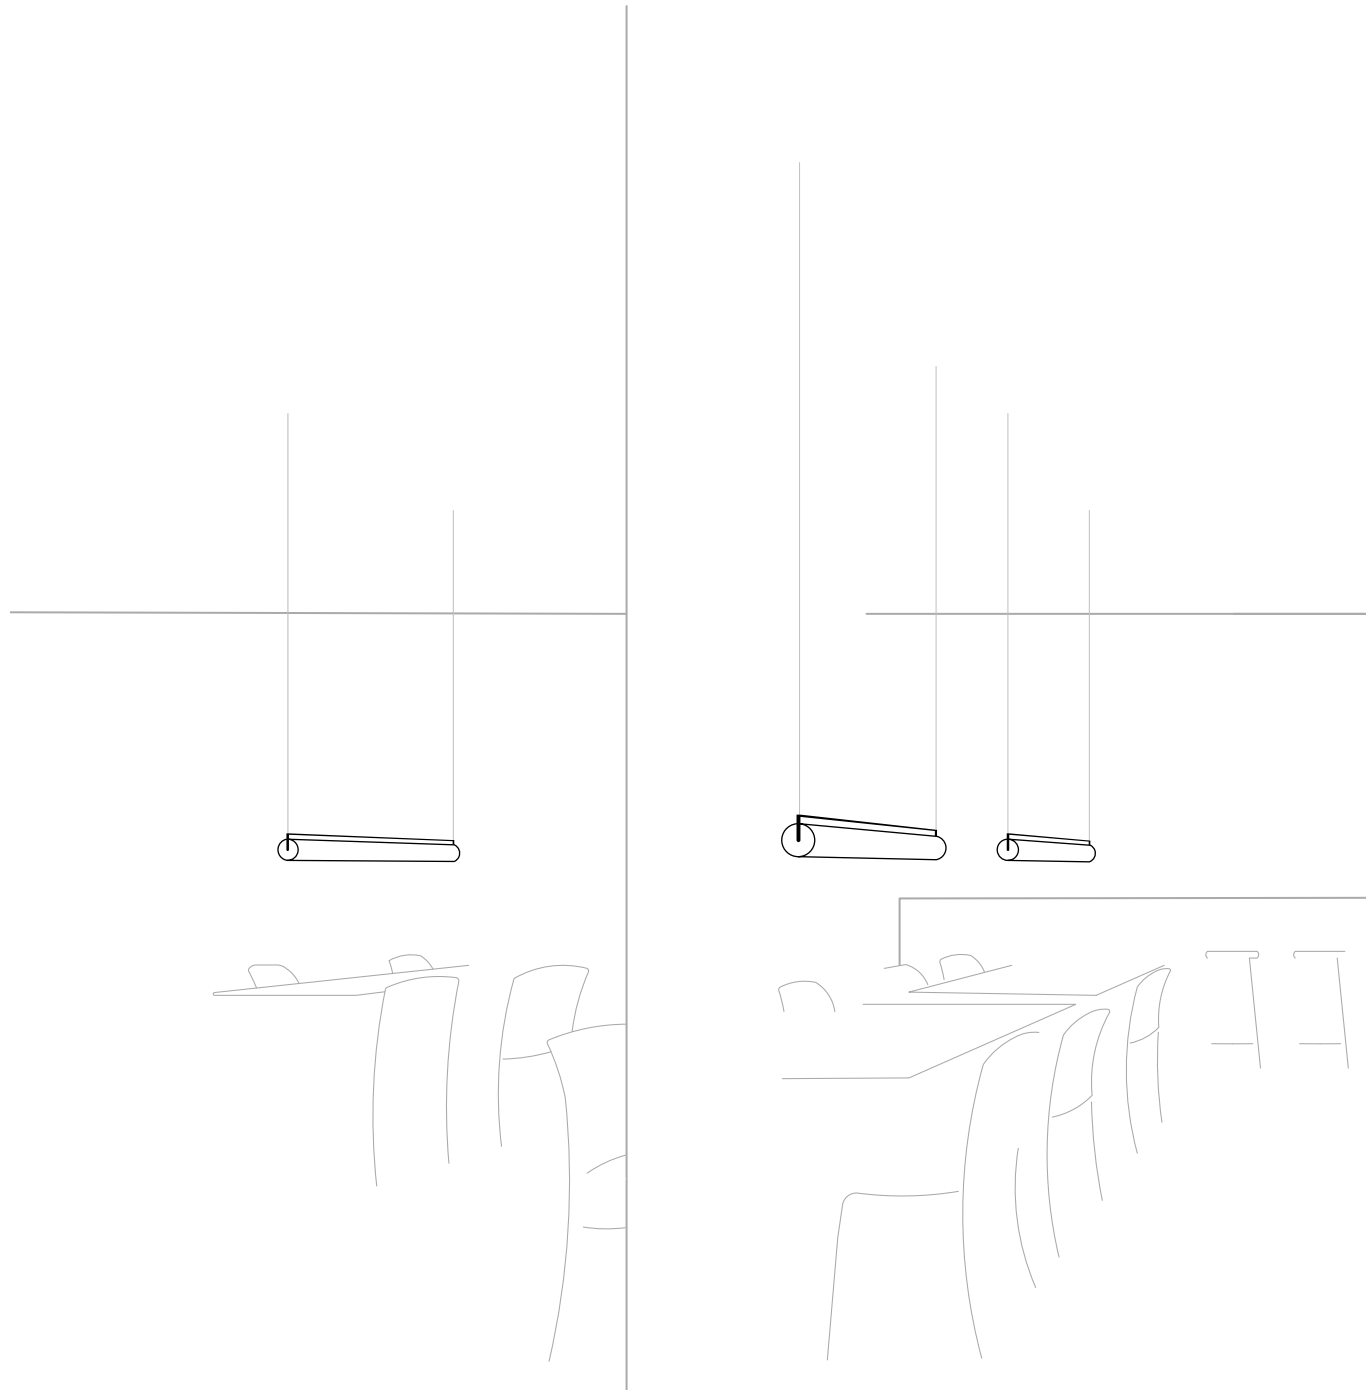

Providing a framework for light, the Kontur collection serves as an elegant stage setting for the linear light source it contains. Its minimalist black frame pairs with different diffusers or reflectors in a poetic balance, creating myriad lighting ambiances.

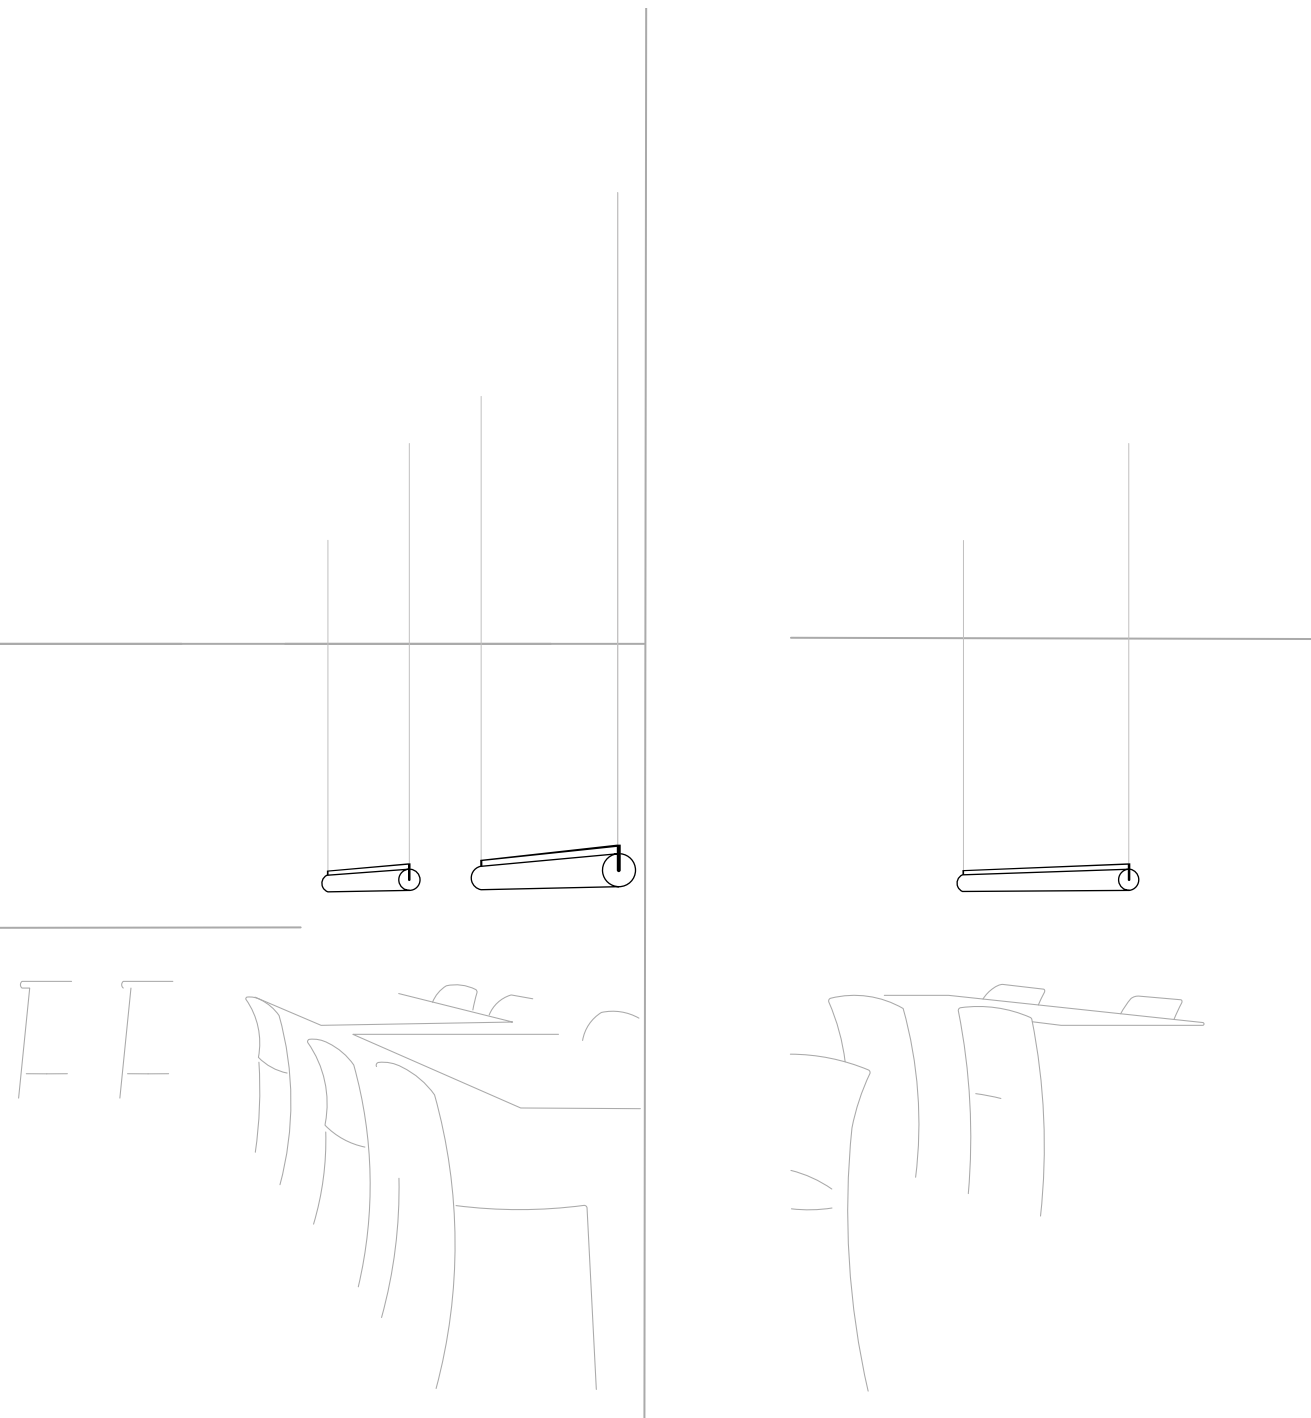

2700K LED colour temperature

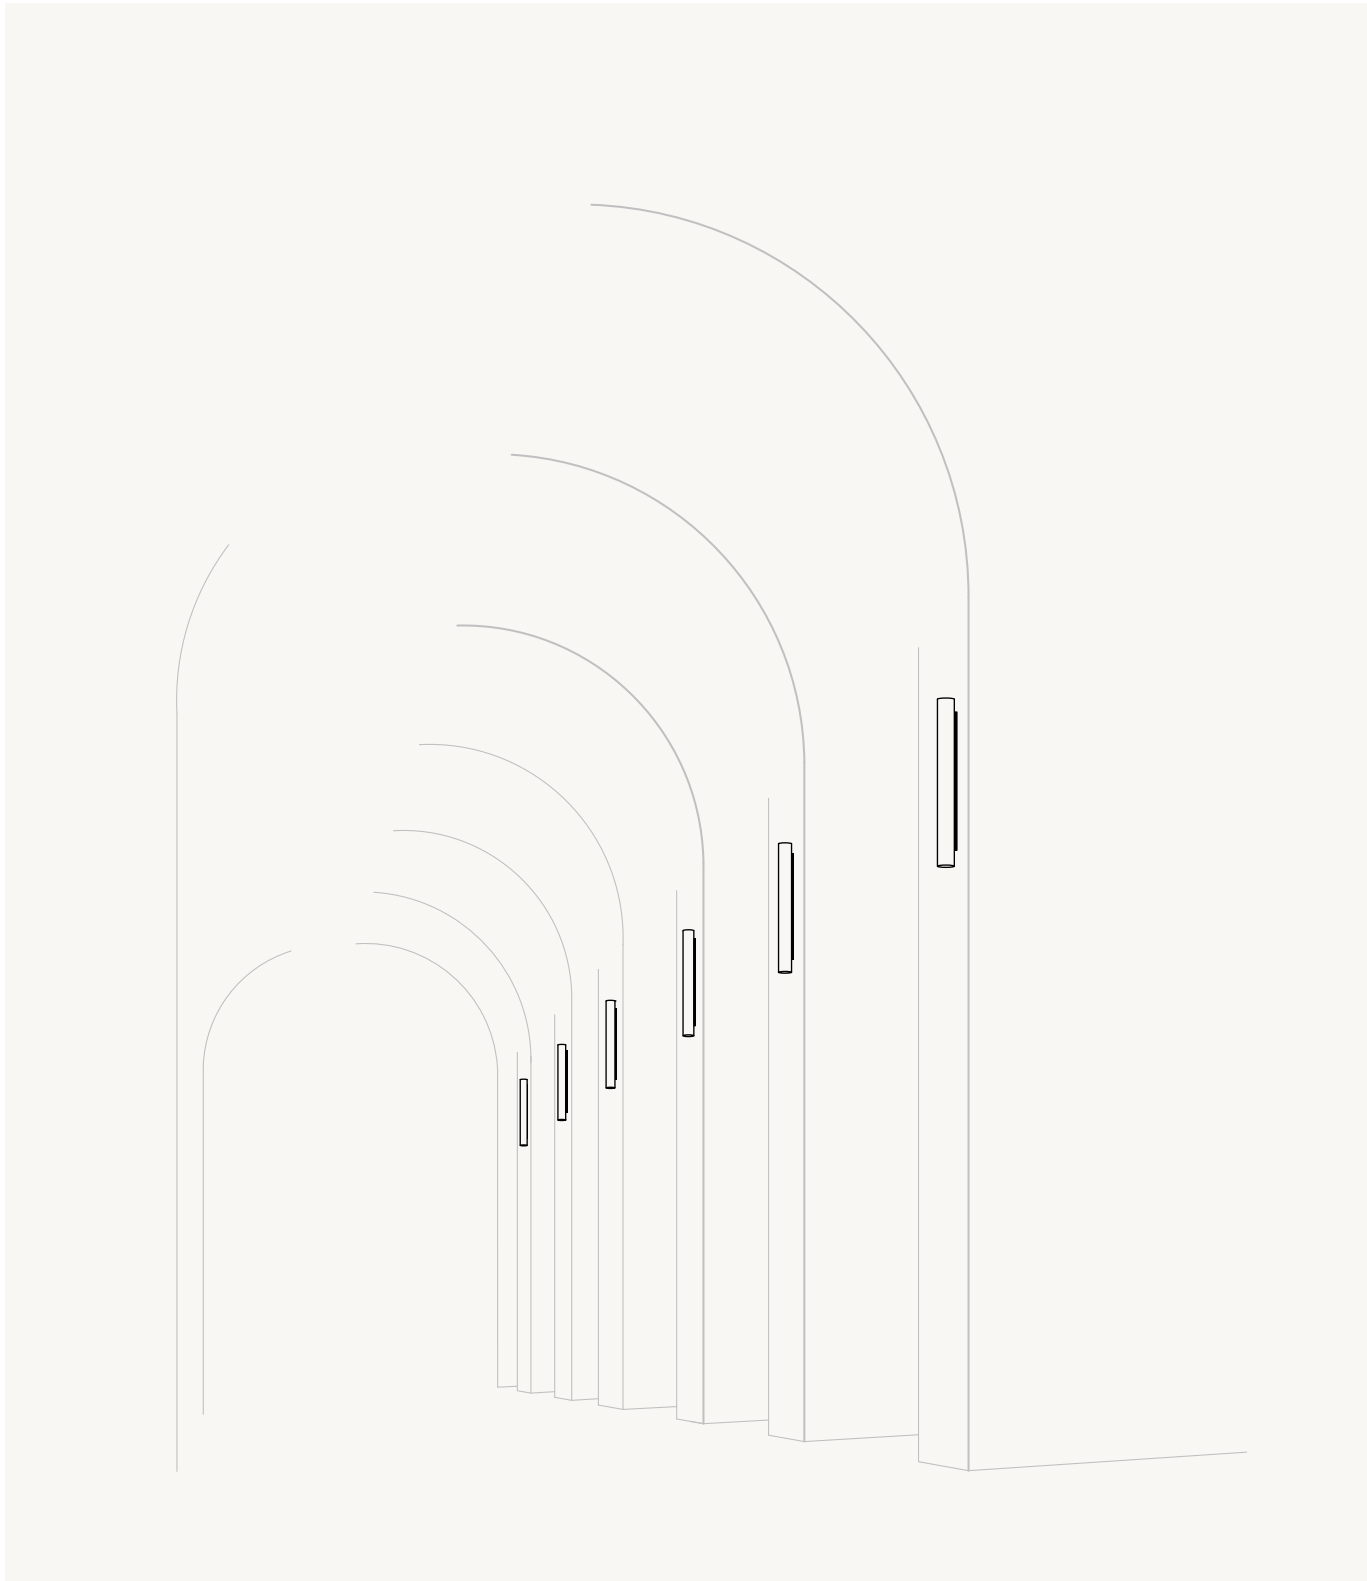

Compose personalised atmospheres with unique combinations of Kontur pendants in a space. Available in a range of LED colour temperatures of 2200 K, 2700 K, 3000 K, 4000 K for warm, candlelit looks or brighter, daytime effects.

Pure and refined, Kontur's cylindrical glass diffuser possesses a timeless sensibility. It generates a warm, 360-degree glow that recalls the romantic look.

Large-scale glass wall lamp

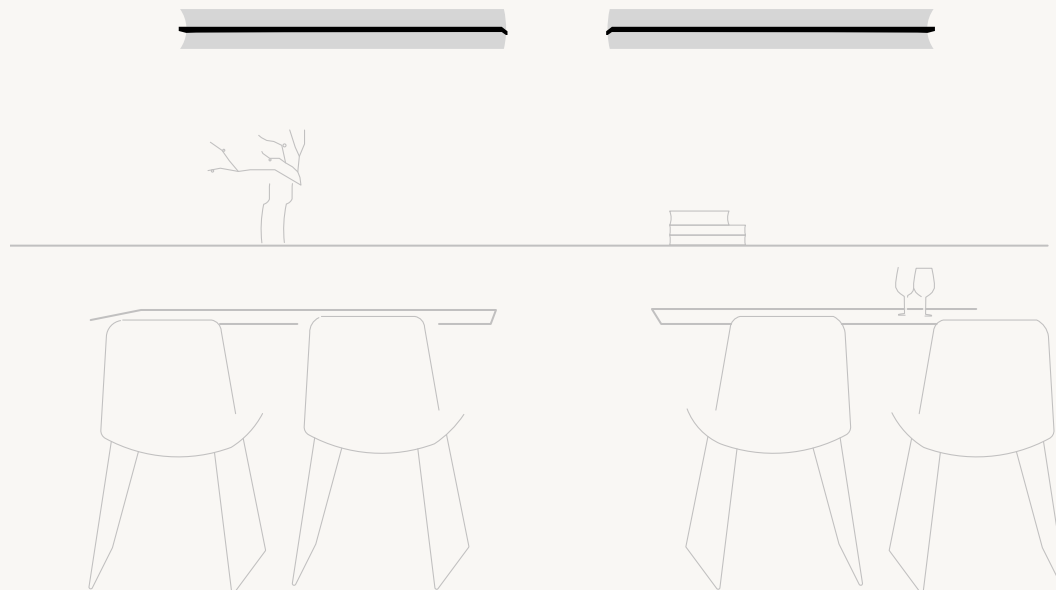

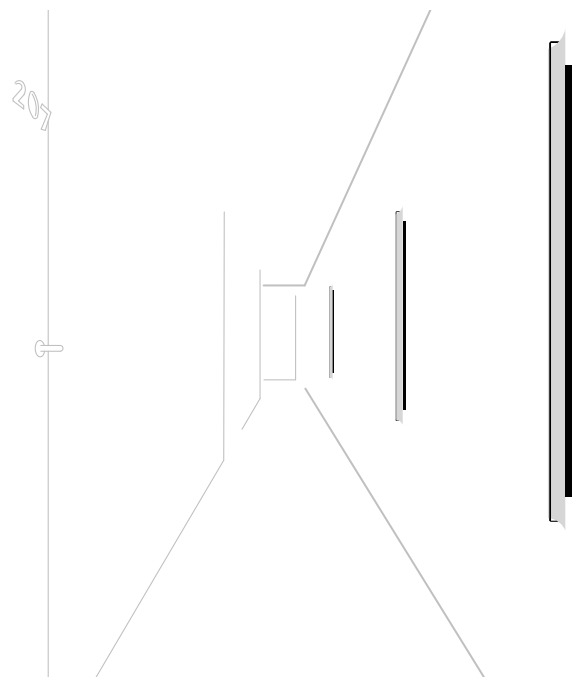

2200 K LED colour temperature

“Kontur is about simplicity and balance. The light is very poetic and features a frame interacting with different shapes to generate myriad lighting moods and atmospheres.”

Sebastian Herkner.

Kontur features a flat metal sheet formed into a rounded reflector, producing a poetic balance within its frame. The look, modern and architectural, lends itself perfectly to meeting or working area settings.

Defined by its sleek, black frame imbedded with LEDs, Kontur explores the concept of linear light with a curved metal reflector. The fine, concave form crafted from a sleek sheet of metal casts indirect illumination that lends the ambient look of raining light.

Kontur is available in two formats: a striking, large-scale wall lamp and a pendant that appears to float overhead from nearly invisible cables. These pure volumes are suspended in a state of elegant balance within their graphic geometric architecture, setting the stage for multiple lighting atmospheres.

● 11 Black (NCS S 8500-N)

Diffuser: Polycarbonate.  
Structures: Aluminum.  
Concave shade: Aluminum.

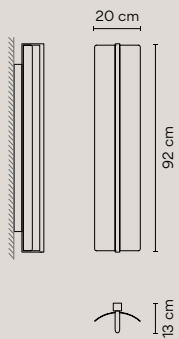

LED 2700 K. CRI >90. 104 lm/W.  
Dimming: 1-10V.

**Personalisation options available**

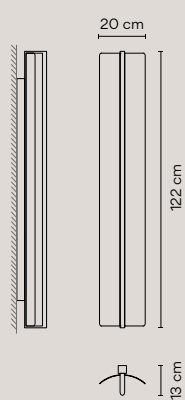

- LED 2200 K, 3000 K, 4000 K
  - Dimming: DALI, Push or Casambi
  - Hanging models
  - Extra cable length
- Request more information.

Distilled to its essence, Kontur glass is distinguished by a streamlined black frame imbedded with LEDs and paired with a cylindrical opaline diffuser. The opaque, mouthblown glass generates a warm, 360-degree glow as if from a fire, its circular silhouette playing counterpoint to the frame's crisp rectangular form. Kontur glass is available in two formats: a bold, large-scale wall lamp and a pendant that appears to float overhead from nearly invisible cables. Pure and elemental, the volumes produce a delicate balance within their graphic geometric architecture, setting the stage for multiple lighting ambiances.
