

Versatile modular composition.

"I DISCHI" composed by several handmade glass "disks", each of which displays a singular, typically Venetian glass working technique - the perfect link between tradition and modernity. Carefully handmade, this product is an elegant, subtle, but incredibly rich accent piece for residential and hospitality projects. Available in two different standard configurations featuring clear glass, this product can also be adjusted and engineered to perfectly adjust to a wide variety of design situations.

I DISCHI

Design by Francesco Dei Rossi
