

NOOR PENDING

Design by Francesco Dei Rossi

A visionary tale of cultural fusion.

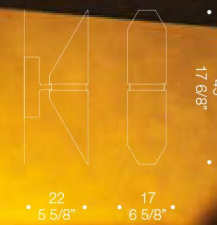

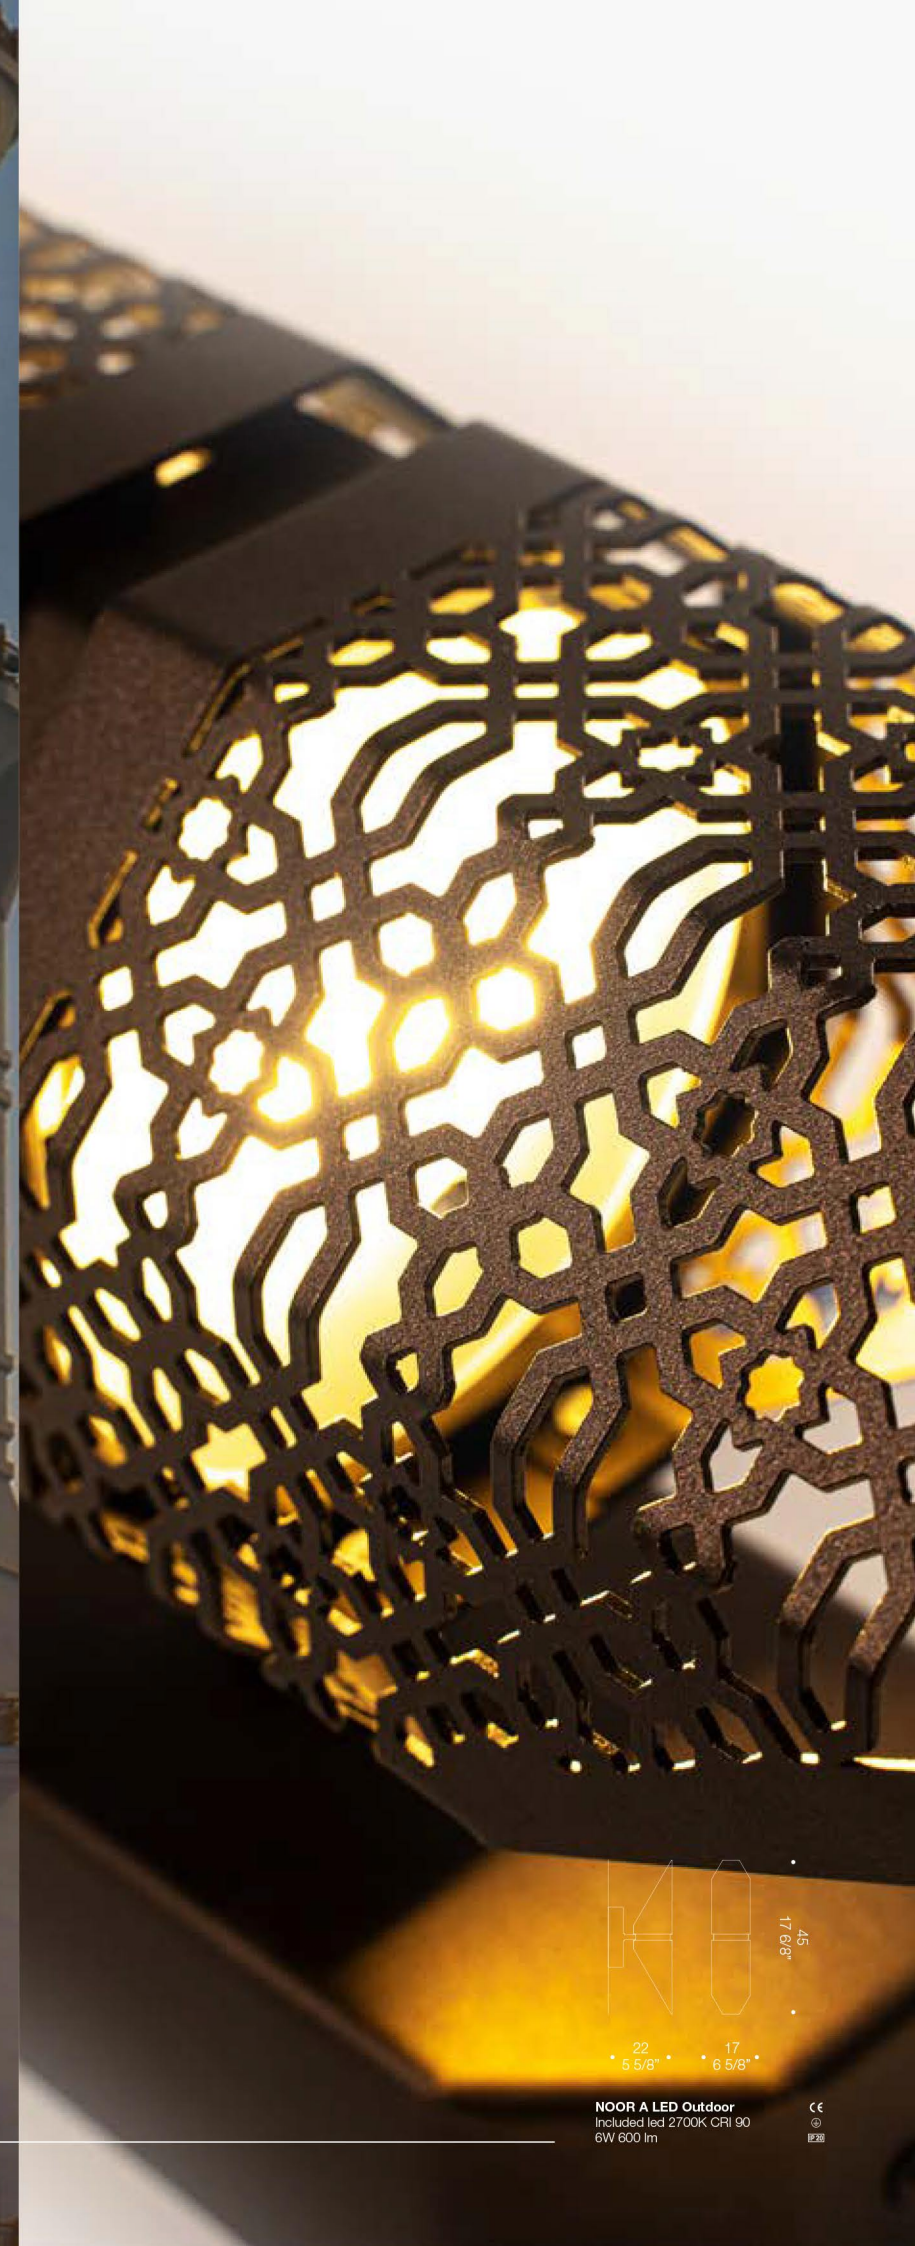

Keeping alive traditional Murano glassmaking heritage while aesthetically drifting towards exotic nuances, Noor represents a well balanced conglomerate of different styles which resolves into the craft of unique lighting pieces which boast a strong character - made by masterful artisans in Murano.

A visionary tale which translates in a collection of opulent lamps and chandeliers, sought after for its effortlessly elegant and sophisticated look. The intertwining of metal patterns with artisanal glass communicates authentic luxury, never sacrificing the importance of light itself, which is the true protagonist of this collection. Each texture is strongly enhanced by the use of light, which almost magically travels along each shape and really carries out a glamorous contrast between materials. Each piece is given the option to be customised as far as metal coatings/treatments and glass colours - this allows further material experimentation and the creation of bespoke and sophisticated pieces.
