

“Kepler is the lighting sculpture with many faces. It would be one of the new appearances resulted by the developments of industrial technique and design methods”

Arihiro Miyake

Kepler

Arihiro Miyake

The Kepler collection is made of painted extruded aluminium, whose continuous line is obtained through a three-dimensional manufacturing process developed by Nemo. Designed on the basis of the mathematical principle of the Möbius strip. Diffuser in opaque technopolymer.

IT La collezione Kepler è realizzata in estruso di alluminio verniciato, la cui linea continua è ottenuta attraverso un processo di lavorazione tridimensionale sviluppato da Nemo. Disegnata alla base del principio matematico del nastro di Möbius. Diffusore in tecnopolimero opaco.

FR La collection Kepler est réalisée en aluminium extrudé peint, dont la ligne continue est obtenue grâce à un processus de fabrication tridimensionnel développé par Nemo. Conçue sur la base du principe mathématique de la bande de Möbius. Diffuseur en technopolymère opaque.

DE Die Kepler-Kollektion besteht aus lackiertem, extrudiertem Aluminium, dessen durchgehende Linie durch ein von Nemo entwickeltes dreidimensionales Herstellungsverfahren erzielt wird. Entworfen auf der Grundlage des mathematischen Prinzips des Möbiusbandes. Diffusor aus undurchsichtigem technopolymer.
