INFINITY

Design by Chiaramonte-Marin / 2021

Create an object that has no limits, that cannot have a conclusion because precisely, without end.
Infinity, is definitely the contemporary and timeless tripod light, as an object of our life that has no need to be reinvented.

THE DESIGNERS

Infinity, as soon as it was launched, receives design awards from Italy and Germany . Here a presentation of the designers who made this particular and timeless floor lamp. A spirit and inspiration from the past for a long future.

CHIARAMONTE ALFREDO & MARCO MARIN DESIGN

The passion for objects meant as industrial products is the glue of the professional partnership between Alfredo Chiaramonte and Marco Marin, promoting partners of the homonymous Designstudio. The different activities experienced through the years (interiors, graphics, industrial and lighting design) brought to a mixed knowledge, contaminated by ideas developed in many fields.

Alfredo Chiaramonte was born in Bologna and studied at the Faculty of Architecture of Venice. Marco Marin was born in Venice and graduated at the Academy of Fine Arts specializing in industrial design.

They worked together with well known furniture and lighting companies. They taught at the European Center for preservation of the architectural heritage in Venice.

Through the years they received many recognitions and some of their works have been exposed in the permanent collections of International Museums, like Museo Correr in Venice, Beaubourg in Paris, Design Museum of Calenzano Anna Querci Foundation) Moma in San Francisco and the Venice Biennale when they worked with Yoko Ono.
