

# olew drops

Design by  
Boris Klimek

## HOW TO ORDER CUSTOMIZED DEW DROPS

- MOQ 2 pcs
- Lead time 16 weeks

### Choose:

1) BELT - color of the vegan leather and thread

2) CANOPIES / BASE - color

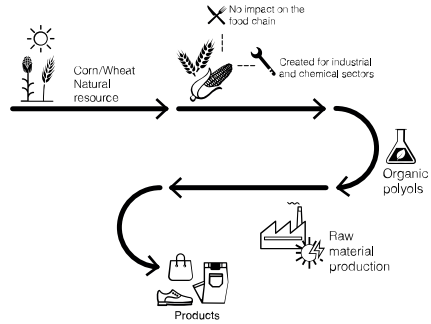

3) DIMMING - type

After making your selection, contact us at [info@bomma.cz](mailto:info@bomma.cz) or find your closest store at [www.bomma.cz/store-locator](http://www.bomma.cz/store-locator).

# ① Choose belt:

Choose one of our preselected combinations of vegan leather and threads or make your combination.

Bomma is using Viridis® vegan leather for Dew Drop light. Viridis® not only has a green origin due to its ingredients but it also shows to be sustainable throughout its entire life. As shown in the Life Cycle Assessment (LCA) report, the production technology, developed specifically for Viridis®, uses bio-based raw materials that have a very limited environmental impact compared to traditional ones.

vegan leather - **029 M - Sand**

thread - **0039 - Sabbia**

02

vegan leather - **060 M - Nude**

thread - **0055 - Pelle**

03

vegan leather - **006 M - Beige**

thread - **0036 - Antilope**

04

vegan leather - **007 M - Cognac**

thread - **0097 - Cognac**

05

vegan leather - **001 M - Brown**

thread - **0015 - Marrone**

06

vegan leather - **002 M - Dark brown**

thread - **0103 - Cioccolato**

07

vegan leather - **008 M - Khaki**

thread - **0065 - Fango**

08

vegan leather - **Black - standard**

thread - **005 - Nero**

09

vegan leather - **003 M - Grey**

thread - **005 - Nero**

10

vegan leather - **021 M - Light grey**

thread - **0109 - Acciaio**

11

vegan leather - **106 M - Off white**

thread - **0111 - Bianco**

12

vegan leather - **014 C - Dark Silver**

thread - **0089 - Topo**

13

vegan leather - **022 M - Blue**

thread - **0009 - Bleu**

14

vegan leather - **024 M - Red**

thread - **0067 - Sangue**

15

vegan leather - **100 M - Yellow**

thread - **0008 - Avana**

16

vegan leather - **263** - **Dark green**

thread - **0025** - **Bottiglia**

17

vegan leather - **209** - **Olive**

thread - **0025** - **Bottiglia**

18

vegan leather - **208** - **Pink**

thread - **0055** - **Pelle**

## ② Choose canopy or base:

Brushed gold

Black

White

## ③ Choose dimming:

### DALI

Digital Addressable Lighting Interface (DALI), is a standardized protocol for lighting control. It enables digital communication among lighting devices, allowing precise control over brightness levels. DALI's two-wire bus system facilitates flexible and interoperable dimming of individual or grouped lights. This technology is known for its seamless integration with building management systems, promoting energy efficiency through centralized control and monitoring of lighting conditions.

- needs 5 cable electric wiring

### TRIAC/ELV

TRIAC or ELV is a semiconductor device commonly used in dimmer switches for incandescent and some dimmable LED/CFL lights. It regulates light intensity by modifying the AC waveform, controlling the power delivered to the bulb. TRIAC dimming is cost-effective and straightforward, but compatibility issues may arise with certain dimmable LEDs and fixtures.

- needs 3 cable electric wiring
- suitable for older el. installations

### CASAMBI

CASAMBI is a wireless lighting control system using Bluetooth technology for dimming lights. It allows users to wirelessly control individual or grouped lights through a mobile app, offering features like scene setting and scheduling. CASAMBI's mesh network ensures reliable communication, making it versatile for various lighting applications. With a user-friendly interface and broad compatibility, CASAMBI is popular for creating smart and customizable lighting solutions in both residential and commercial settings.

- needs 3 cable electric wiring
- done by Bluetooth
