

[En] > When the lighting fixtures is off, the surface of the silkscreened glass diffuser looks like an even white surface, and you can see only the outlines of the floral decoration. When on, the surface is alive with different color shades, due to the number of silkscreen layers. Along the outline of the decoration, the light is clearer because there is less color; instead towards the center, where there is more color, the intensity of light decreases.

[It] > La superficie serigrafata del diffusore in vetro piano, quando la lampada è spenta, si presenta come una superficie omogenea bianca in cui si notano solo i contorni del decoro floreale. Con la luce, la superficie si anima di diverse tonalità determinate dalla quantità di strati di serigrafia. Lungo il perimetro, la luce è più chiara poichè minore è l'apporto di colore, mentre verso il centro, dove questo è maggiore, diminuisce l'intensità luminosa.

DROP MIRROR wall

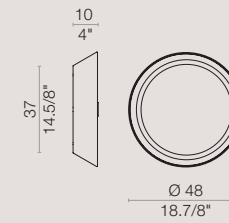

design Brian Rasmussen

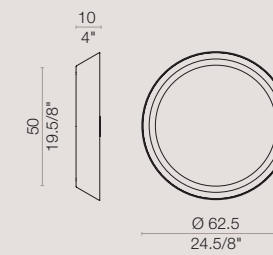

[En] > The DROP MIRROR version replaces the silkscreened glass plate with a mirror. The mirror has a sandblasted band which is illuminated from behind. The lamp also illuminates laterally through the prismatic PMMA structure.

[It] > La versione DROP MIRROR sostituisce la lastra in vetro serigrafato con uno specchio. Lo specchio ha un bordo sabbiato che lascia passare l'illuminazione retrostante. La lampada si illumina anche lateralmente attraverso la struttura in PMMA prismatica.
